Hackathon idea scoring: AI skills showcased vs. 3-day shippability

Scored against the **actual C15 IST course schedule, Days 1–11** (the "AI Generalist Accelerator Program – C15 IST Detailed Schedule" doc). Days 12–14 (pitching, OpenClaw/Hermes, graduation) are excluded; Day 13 lands the night before the deadline.

Skills we can showcase (from Days 1–11)

Key	Skill	Day	Tools taught
K1	Context engineering, custom instructions, meta-prompting	1	Claude, ChatGPT
K2	AI image/video + personal clone (video, voice, image)	2	HeyGen, ElevenLabs
K3	n8n automations, API integrations	3	n8n
K4	Agentic AI "AI employee" with RAG knowledge base	4	n8n, Pinecone, ChatGPT API
K5	Build your own MCP server	5	Claude, MCP
K6	Human-like voice agent (system + meta prompts)	6	Retell AI, n8n
K7	Multi-agent system with Gmail / Calendar / transcription ("Jerry")	7	n8n, Gmail, Google Calendar, Fireflies
K8	n8n wired to a backend + GitHub, automated deploys	8	n8n, GitHub
K9	Building with coding agents	6, 9, 10	Bolt, Lyzr, Codex, Antigravity
K10	Claude Code / Cowork routines and schedules	11	Claude Code, Cowork

K9 applies to every idea (it is how we build), so it is not a differentiator below.

✓ = fits naturally, ~ = possible but forced or a stretch, blank = no real fit.

Scores

Idea	K1	K2	K3	K4	K5	K6	K7	K8	K10	Natural fits	3-day risk
Resume-to-Interview Coach	✓ interviewer persona prompts	✓ HeyGen/ElevenLabs clone as the interviewer	✓ session-report pipeline	✓ Pinecone RAG on resume + JD + question bank	~ MCP so Claude can run a practice session	✓ Retell voice mock interview	✓ research → interviewer → evaluator agents; Calendar booking + Gmail report	✓ n8n ↔ Supabase, GitHub deploys	~ daily practice reminder	**7 (+2 stretch)**	**Low.** Core flow is small; extras layer on top
Campaign Planner	✓	✓ ad images, clone video ad, voiceover (exactly Day 2)	✓ post publishing	✓ brand-guide RAG	~	~ voice brief intake	✓ strategist / copywriter / designer agents; real Google Calendar	✓	✓ scheduled posting	7 (+2 stretch)	**Medium-high.** Calendar UI + many generators, slow/costly media credits, sprawl
Task Management App	✓ extraction prompts		✓ notify owners	~	~	~	✓ meeting transcript → tasks → email (very close to “Jerry”)	✓	✓ reminders	5 (+3 stretch)	Low, but reads as a rebuild of Day 7’s Jerry
Collaborative Notetaker	✓		~	✓ chat with your notes	~	~ voice notes	~	✓	~	3 (+5 stretch)	Medium. Real-time sync eats build time
AI Interior Makeover	~	✓ image editing	~					~		1 (+3 stretch)	Low, but one-trick

Idea	K1	K2	K3	K4	K5	K6	K7	K8	K10	Natural fits	3-day risk
Personal Finance Manager	✓ categorisation		~	~				~	~	1 (+4 stretch)	Low
Personal Health Manager	✓		~			~		~	~	1 (+4 stretch)	Low
Pet Care Companion	✓ checklist extraction	~	~ reminders	~			~ calendar	~	~	1 (+6 stretch)	Low

Recommendation: Resume-to-Interview Coach (unchanged)

- Ties with Campaign Planner on breadth (7 natural fits each) but wins on **voice (Day 6 weekend centerpiece)** and on **shippability**.
- Hits the three biggest builds of the course in one coherent product: the Day 4 RAG “AI employee”, the Day 6 Retell voice agent, and the Day 7 multi-agent + Gmail/Calendar pattern.
- Day 2 fits too: use your HeyGen/ElevenLabs clone as the on-screen interviewer for the Loom.
- One end-to-end flow (what the playbook asks for): upload resume + paste JD → grounded questions → answer by voice or text → scored feedback → saved session + emailed report.
- **Runner-up: Campaign Planner**, if you want Day 2 media generation to be the star. Same breadth, higher scope risk, voice is forced.
- **Avoid Task Management:** it is the closest match to the Day 7 “Jerry” build, so judges may see it as a class exercise.

Suggested MoSCoW sketch

- **Must:** sign-in, resume upload + parse, JD paste, 5–8 tailored questions, written answer → AI feedback with score, save session (Supabase).
- **Should:** Retell voice mock interview (asks questions aloud, transcribes answers); n8n workflow emails a session report via Gmail.
- **Could:** Pinecone question bank + company-research agent for 2–3 company-specific questions; HeyGen clone interviewer intro; Calendar booking for next practice.
- **Won’t now:** video-of-candidate analysis, payments, team accounts, custom MCP server.
